

INSTALLATION INSTRUCTIONS

IMPORTANT

Before installing your Lights.com Post, please make sure that you carefully read through these instruction sheets. Consider having your fixture installed by a qualified licensed electrician.

NOTE: The important safeguards and instructions that appear in this manual are not meant to cover all possible conditions and situations that may occur. It must be understood that common sense, caution and care, are factors that can't be built into any product. This approach must be used by the person(s) caring for and operating the fixture.

APPLICATION

Light Post

MODEL NO.

LC005308

GENERAL INFORMATION

Installation and all electrical connections must be made in accordance with all ordinances, and Local and National Electrical Codes.

STEP BY STEP INSTRUCTIONS

Before starting your installation, disconnect the power by turning off the circuit breaker or by removing the fuse at the fuse box. Just turning the light off at the light switch is not sufficient to prevent electrical shock.

WHAT WE PROVIDE

- 1 x Post

WHAT YOU NEED

- Shovel
- Gravel or Crushed Stone
- Asphalt Sealer
- Stakes and Twine
- Concrete

1

UNPACK FIXTURE

INSTALLATION INSTRUCTIONS

2

DIG A HOLE

Dig a hole 16" in diameter. Check with local building codes for hole depth.

3

PREPARE PLACEMENT

Layer the bottom of the hole with 4" of gravel or crushed stone.

4

SEAL AND INSTALL POST

Paint the lower section of the post that will be buried in the ground with an asphalt sealer to prevent damage to the post from the concrete. Place the post in the center of the hole and feed the wire through the bottom hole. Use stakes and/or twine to support the pole and keep it level.

INSTALLATION INSTRUCTIONS

5

POUR CONCRETE

Mix and pour concrete per the manufacturers instructions.

Let the concrete dry completely.
